Dear Friends and Neighbors,

As we enter the summer season I want to let every Warren resident know that our administration continues the work to improve the quality of life in our community.

We continue to work to move the Warren Towne Center project forward. This \$170 million project would create a new walkable downtown with dining, shopping, a hotel and entertainment venues that would make Warren a destination in southeast Michigan. And all of it would be created at no cost to city residents. Just think how nice it would be on a beautiful summer evening to be able to walk to nice shops, pubs, restaurants or even live in one of the new loft apartments. This dream is still possible to come true with action from city council. I won't stop working to make this dream a reality.

We aren't only focused on the new downtown, but also on improving our world class parks. This summer you will see upgrades to bathroom facilities, playground equipment, landscaping and other amenities that help make our parks a treasure for our kids, our families, and our entire community. Make sure you go check them out at some point this summer.

Planning continues for a state-of-the-art skate park that will give our kids and grandkids a place to show off their skills on bikes and skateboards. This innovative project would also stand out in the region and give our young people another great outlet away from screens to enjoy the outdoors.

We are also working to make our public spaces more hospitable to insects that we need to have a healthy environment like bees and butterflies. I'm sure you've heard of environmental problems created from the depletion of habitat for bees and butterflies that

can be felt across our ecosystem. We're working to make Warren a part of the solution and not part of the problem, so keep your eyes out for the beautiful butterflies that will soon be thriving right here in Warren.

None of us who lived through the massive flooding of 2014 will ever forget it. Torrential rains overwhelmed our infrastructure causing over \$1.2 billion in damages to homes, vehicles and businesses across our city, and even more across the region in southeast Michigan. Since that time my administration has taken action to improve infrastructure to protect against such a catastrophe from ever happening again.

Last summer, while every rain seemed to bring a new flooding event to our neighbors in the region, Warren homes were largely protected from the steps we've taken. We continue to move forward building a detention basin that will collect excessive rain water instead of sending it into residents basements. This investment protects our residents, our businesses and the assurance we need when it begins to rain.

The people of Warren are incredible and deserve a government focused on protecting and serving their interests. That's exactly what this administration is doing, and will always do. So enjoy the summer, check out our parks, enjoy the butterflies, and everything our great city has to offer!

Sincerely,

James R. Fouts
